

# INTEGRATED WINDOW FLASHING

# Integrated window flashing

## THERE IS NO BETTER SOLUTION FOR LIGHTWEIGHT CONSTRUCTION

HAVE YOU EVER EXPERIENCED WATER INGRESS? YOU NEED HALO AQUASHIELD™.

**Severe weather can lash house facades with destructive winds and rain.**

When it comes to the entry of moisture and air infiltration, window openings are the most vulnerable points. A ring of weatherproof flashing around the windows will ensure the building envelope is not penetrated. Using the best possible quality product is critical. It will make sure you comply with NCC requirements. So, which type of flashing should you choose?

### “THE SEAL OF APPROVAL”

HALO Aquashield™ is not just deemed to satisfy, it has been tested by NATA accredited laboratories and proven to provide superior water penetration resistance to traditional methods.

AUSTRALIA'S ONLY INTEGRATED FLASHING SYSTEM FOR LIGHTWEIGHT CLAD CONSTRUCTION.

**Designed specifically for modern lightweight clad construction, HALO Aquashield™ is the only integrated flashing system which effectively seals the gaps between windows, and wall frames.**

Its hardened “flashing fin” surrounds the head, jamb, and sills of a window. It forms an impermeable seal that can be bonded directly to the building wall wrap, providing the building envelope with superior weatherproofing and air infiltration performance. HALO is also compatible with sliding doors, surrounding the head and jamb of the doors.

HALO Aquashield™ is a tough barrier against the harsh elements which mother nature can throw at our houses, preventing water ingress.

It also improves the airtightness of windows and sliding doors, so the house is more energy-efficient and feels more comfortable.

“Aligning with the sophisticated aesthetic and performance of SHAWOOD's advanced wall system, our architectural desire to pursue a flush external finish of cladding to windows led us to HALO Aquashield™.

HALO with its integrated flashing system complements Sekisui House's uncompromised standards of delivering the highest level of quality within our SHAWOOD homes.

HALO is a practical and compliant weatherproofing system of the highest standard.”

- Mark Davey, Sekisui House

# The HALO effect

TOTALLY TRANSFORMING HOW WINDOWS ARE INSTALLED.

**HALO Aquashield™ is not just another adapter – it is a fully integrated flashing system that makes the building process more efficient and stress-free.**

Installation times are cut dramatically because HALO Aquashield™ is pre-fitted to the window frames at our factory and delivered to the site ready for installing.

All you need do is follow our simple 3 step process. In real terms, this can represent up to 40% saving on traditional installation costs.

The Australian Glass & Window Association (AGWA) has been established to ensure that manufacturers produce windows and doors that meet – if not exceed – stringent safety and structural standards. From material selection and workmanship quality to weather sealing and applied finishes, all aspects of production are scrutinised to ensure that they meet the relevant Australian standards.

WORLD RECOGNISED  
ACCREDITATION

The AGWA label on each and every product means that you can be confident that our vast range has been tested, certified and guaranteed by independent inspectors accredited by the National Association of Testing Authorities.

All products shown in this catalogue are representative of what can be achieved and are subject to individual finishes and installation techniques. Bathurst Glass & Windows Pty Ltd reserves the right to modify sizes and details without notice. Bathurst Glass & Windows Pty Ltd does not accept liability for the appearance of your finished product.
